

# Testing Proof

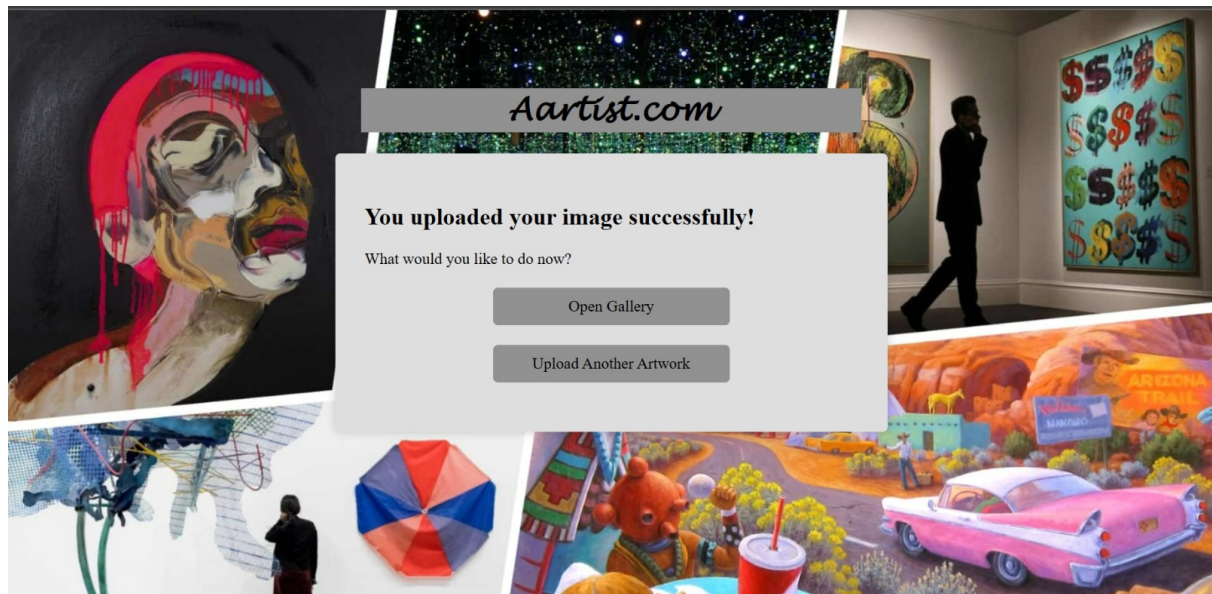

1. The front page of Aartist.com has the option to choose a file in a .jpg/.jpeg/.png format and then an upload button.

2. In case a user uploads a file which does not satisfy the image file format it would display as an Invalid Submission and an option to upload again.

3. Once the image with the accepted format is uploaded, the user will be directed to a page where the user can choose to either look at the uploaded image along with the other images in the Gallery or the user can upload another file.

4. If the Gallery is selected the user will be directed to the page containing all the images, if the upload another Artwork is selected the user will be directed to the front page of Aartist.com.
